

## Environmental Commitment

As a Software as a Medical Device (SaMD) company that operates in many countries globally, Circle strives to create environments that enhance the lives of our customers and employees, but a changing world brings both uncertainty and opportunities.

In response, Circle is committed to making a positive impact by mitigating climate risk through investments in practical, cost-effective solutions that reduce our carbon footprint together with our partners.

Circle places climate-related considerations at the forefront of our decision-making and plan to reach and support net-zero carbon emissions per the outlined timeline below:

**2025 Goal** - *Net-zero Carbon Emission transition plans in place for Circle Cardiovascular Imaging*

**2027 Goal** - *50% reduction in total carbon produced by Circle's directly managed operations in Canada and worldwide as applicable.*

**2032 Goal** - *Circle to achieve net zero emissions and 50% carbon reduction of Circle's supplier base*

**2040 Goal** - *Global portfolio is net zero carbon*

## Policy 1.1.10 Environmental Commitment Revision History
